DENY

D  
B1Chinese Obligations

- o China's agreement to adhere to the Missile Technology Control Regime guidelines and parameters took effect on March 23 of this year with the effective lifting of US sanctions against two Chinese firms.
- The MTCR calls for a "strong presumption of denial" on export of any Category I items (including complete missiles or space launch vehicles, missile stages, rocket engines, and guidance sets).
- 
- For Category II items--dual-use items applicable to missile development--the MTCR calls for a case-by-case review of transfers to ensure exports do not aid a proliferant nation's development of a Category I system.
